

Dual-Colour Dual-Function Rain Light

The Dual-Coloured Rain Light from **CARTEK** provides race cars with a Red, high intensity light for use during wet races, as well as a flashing Amber light for use as a hazard warning device.

The Red element meets the latest FiA specification for size, intensity and viewing angle while the Amber light incorporates a micro-electronic circuit to create a double-pulse, hazard flashing arrangement for a highly visible alert indication to drivers behind.

SPECIFICATION:

Size: 91mm X 58mm

Weight: 150g

Construction: One-piece solid resin moulding

Lighting: RED: Fifteen 10mm multi-chip LEDs, 5x3 formation, 40cm² area
 ORANGE: Eighteen 5mm LEDs, 25cm² area

Intensity: RED: 220cd straight ahead, 190cd @ 10deg viewing angles
 ORANGE: 100cd straight ahead, 75cd @ 5deg viewing angles

Electrical: RED: 9V - 16V, 250mA @ 13.5V = 3.3W (static)
 ORANGE: 9V - 16V, 70mA @ 13.5V = 1W (flashing)

Mounting: Two M6 steel studs
